4. Library

What's new?

Will allow the user to **view and select different improvement projects of various categories**

List of Categories :

My Projects - all project created / started by the user

Teacher

Student

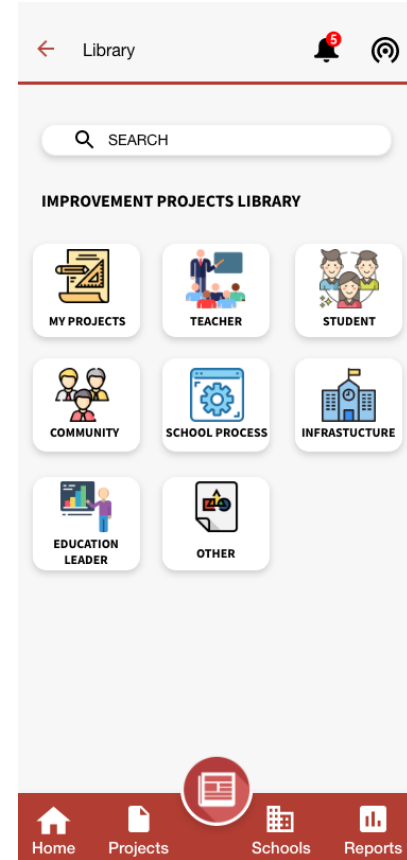

Community

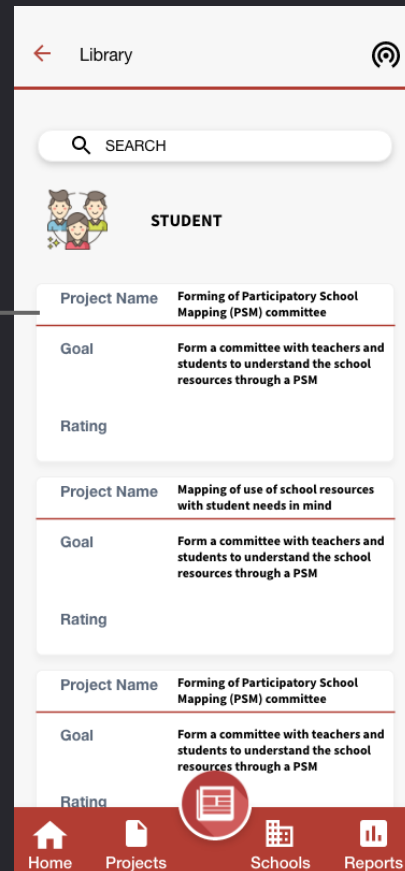

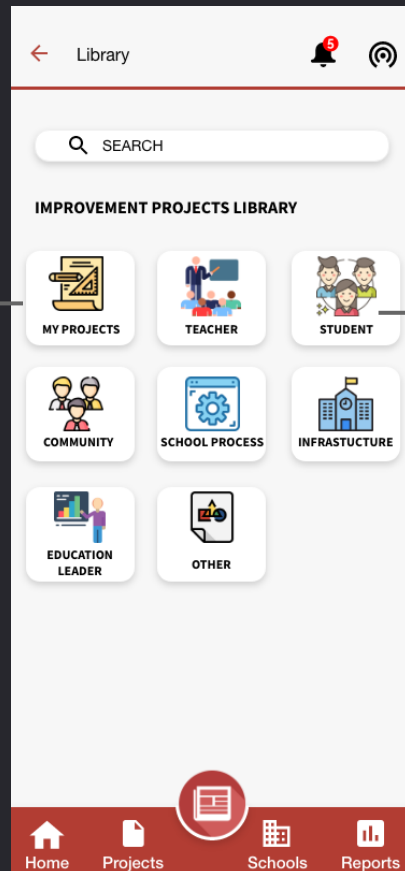

School Process

Infrastructure

Education Leader

Other

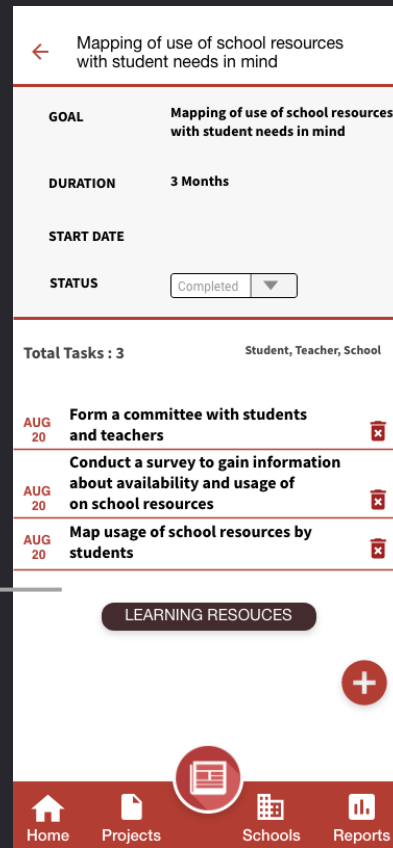

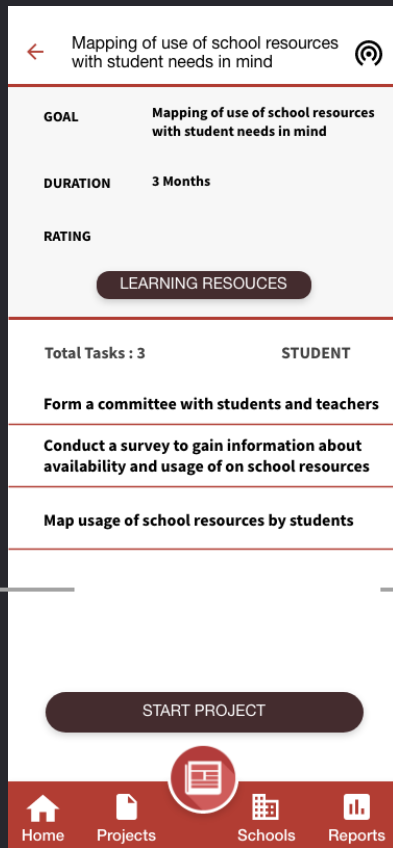

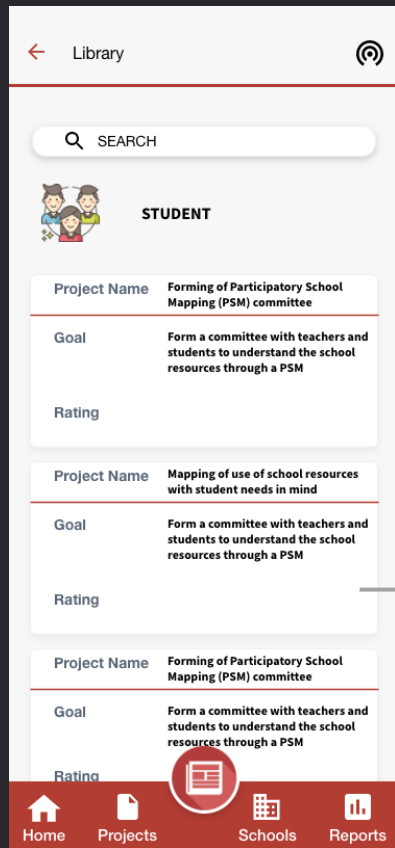

Allows users to view and select pre-designed improvement project from various categories.

My Projects in library will allow user to see improvement projects created by the user

5. Adding project from Library

Once user chooses improvement and starts the project - it allows them to create a copy of the project and edit it which will reflect in **My projects in the library**

Learning Resources tab - takes the users to Bodh where they can find content related to the improvement project

6. Reports

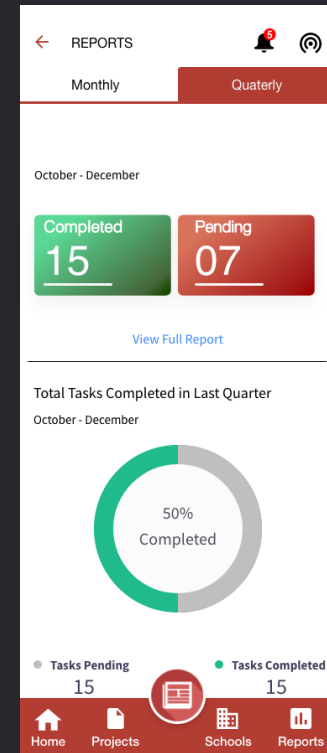

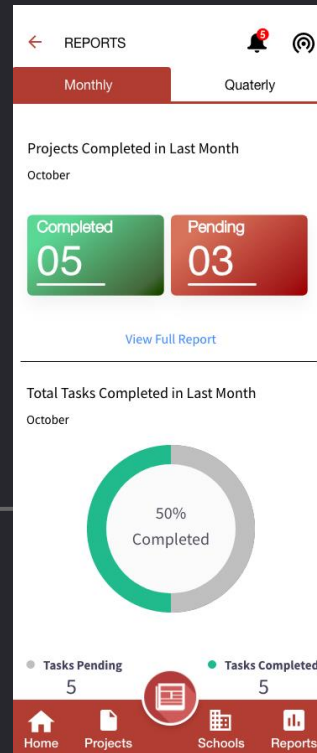

.What's new?

With this upgrade the submission screen is divided in three parts for better understanding of user

A possible use case:

As a user now you can see your submissions divided in three categories, 'All', 'On-going' and 'Completed'.

The observation will appear in order of latest – oldest.

Allows users to View monthly and Quarterly reports of improvement projects

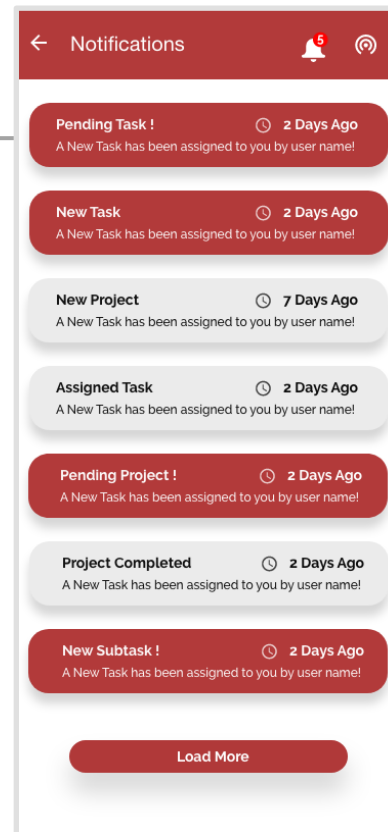

7.
